Abstract. Please substitute this for your 100-words abstracts.

Keywords: AQIS, template

1 Format of the Manuscripts

The camera-ready version should be submitted via the camera-ready submission page. It should follow the style described below.

Basic Format:

- When you create PDF file from your manuscript source (especially from MS-Word), please select fonts carefully for some fonts cannot be handled well by PDF creating system.
- The manuscript should not exceed two pages including the title page, using A4-sized papers.
- No page of the manuscript should contain page numbers/page headings.

Layout:

- The manuscript should have top-, foot-, and side-margins of 2cm, 2.5cm, and 1.5cm, respectively (the title page should have top margin of 3cm).
- The manuscript should begin with a title, followed by names, affiliations and postal addresses of authors, followed by a 100-word abstract and keywords. The main body should use two-column style. E-mail addresses of authors should be placed in footnotes.

2 Theorems and Proofs

Our style file prepares the following environments.

Environment name	Heading
`definition`	**Definition**
`theorem`	**Theorem**
`lemma`	**Lemma**
`corollary`	**Corollary**
`proposition`	**Proposition**
`example`	**Example**
`remark`	**Remark**
`fact`	**Fact**
`conjecture`	**Conjecture**

*`jaewan@kias.re.kr`
†`juhui@kias.re.kr`

3 Figures and Tables

For figures and tables, the captions should be placed below figures and above tables.

4 Bibliography Styles

The following bibliography style used in this document is preferable. The authors may use common abbreviations for journal and conference names.
